

# FEDERAL WILDLAND FIRE QUALIFICATIONS SUPPLEMENT TO NWCG PMS 310-1

2013

ARCHIVED

# INTRODUCTION

The *Interagency Wildland Fire Qualifications System Guide* (PMS 310-1) establishes minimum requirements for training, experience, physical fitness level, and currency standards for wildland fire positions. When criteria for inclusion in the PMS 310-1 (<http://www.nwcg.gov/pms/docs/docs.htm>) are not met for a position, wildland fire agencies have the option to establish agency-specific positions and standards for those positions based on unique missions and needs. Agencies that utilize positions not contained in the PMS 310-1, broadly referred to as Technical Specialists, typically establish minimum standards for these positions in agency-specific manuals or guides.

The federal wildland fire agencies have consolidated these other positions into a single supplement to better support their use and mobilization. The *Federal Wildland Fire Qualifications Supplement to NWCG PMS 310-1* includes federal agency-sponsored positions that are not included in the 310-1 which are frequently used on wildland fire incidents.

Positions and associated requirements listed in this supplement have been approved for inclusion by representatives from their respective agencies. This supplement lists established minimum requirements for training, experience, physical fitness level, and currency standards for all participating agencies. Where necessary, these positions include training to meet NIMS requirements.

This supplement incorporates by reference all applicable qualification and certification business practices from the PMS 310-1 and other agency guides.

## HOW TO USE THIS SUPPLEMENT

The appearance of a particular agency's emblem at the top of a qualification description page indicates acceptance and use of the position by that respective agency; absence of an emblem indicates the position is not used by that agency. When an agency has requirements for a position that differ from common requirements, the additional requirements will be listed under the section titled *Agency-Specific Requirements*. The absence of additional agency-specific requirements indicates universal acceptance by all participating agencies of the common requirements listed on the qualification description page.

When additional requirements apply for an agency, the position must be added to an incident responder's IQCS records under the respective agency set id. Position task books for all agency-endorsed positions in this supplement are available for download on the NWCG *Agency Specific Taskbooks* web page at <http://www.nwcg.gov/pms/taskbook-agency/index.htm>.

This supplement will be updated annually or as needed. Proposed changes or additions to this document or position criteria should be channeled through a respective wildland fire agency training representative for approval and inclusion.

AGENCY	AGENCY-SPECIFIC REQUIREMENTS
BLM	<p>Successful completion of Wildland Fire Chain Saws (S-212) including the field exercise or those portions of S-212 appropriate for Faller A/B/C duties.</p> <ul style="list-style-type: none"> <li>• Agency Administrator (or delegate) certification of qualifications after verification that training is successfully completed.</li> <li>• Documentation must be maintained for individuals.</li> <li>• BLM has established the following minimum qualification and certification process for Chainsaw Operators:</li> </ul> <p>The individual tasks required for completion of the “A” position task book and the final certification for the “A” level saw operators must be certified by a qualified “B” or “C” level saw operators.</p> <p>The individual tasks required for completion of the “B” position task book must be evaluated by a qualified “B” or “C” level operator. The Final Evaluator Verification for “B” level operators must be signed by a “C” level saw operator.</p> <p>The individual tasks required for completion of the “C” position task book must be evaluated by a qualified “C” level operator. The Final Evaluator Verification for “C” level operators must be signed by a state approved “C” level certifier.</p> <p>Each of the states/regions will certify and maintain a list of their current “C” class saw operators who they approve to be “C” class certifiers.</p>

AGENCY	AGENCY-SPECIFIC REQUIREMENTS
	<p>The certification of “C” class certifiers will remain the responsibility of the agency administrator or delegate.</p> <p>For non-fire saw operators a five year currency for all levels of chainsaw operators will be maintained by documented field operations.</p> <p>All fire-related (Red Carded) saw operation qualifications are maintained through the IQCS system and will have a currency of five years.</p>
BIA	<p>FALA and FALB operators only need to complete chainsaw operator training once and maintain currency thereafter by simply performing that position at least once every five years.</p> <p>FALC and CCRT operators are required to attend recertification training every three years. This training should be recorded as BICFLR (C Faller Course) in IQCS.</p> <p>Initial certification of BIA and tribal FALC’s and CCRT’s can only be obtained by attending a BIA sanctioned C Faller Course.</p> <p>Subsequent re-certifications may be administered by other regional C-certifiers, provided the CCRT administering the evaluation is recognized by the Bureau.</p> <p>CPR and first aid training will be completed as every two years. CPR and first aid training will not be included as disqualification criteria in IQCS. It is not an absolute necessity that every individual assigned to projects using chainsaws possess currency in CPR and first aid training. However, there should be an adequate number of certified individuals to provide first aid services commensurate with the need based on an assessment by the supervisor.</p>
NPS	
USFWS	<p>“A” positions can fell trees up to 8 inches DBH, “B” positions can fell trees up to 24 inches DBH, and “C” positions have no limit on tree size.</p> <p>All FWS saw operators on wildland and prescribed fire incidents must complete the NWCG S-212 course, including the position Task Book appropriate to the “A” class operations.</p> <p>Regions will provide final recommendation for the certification of all “C” class evaluators within their region and maintain a list of current, qualified “C” class evaluators.</p>
USFS	<p>Firefighter Type 2 (FFT2)</p> <p>The Sawyer Certification System is outlined in policy in the FSH 6709.11, sec. 22.48, b. 4 and Regional Supplements. Those documents are utilized in the certification process.</p> <p><b>REQUIRED TRAINING:</b> Annual Fireline Safety Refresher (RT-130)</p>
